

# M5 J1-2 Oldbury Viaduct works

## e-bulletin – 04 May 2018

We are still aiming to complete the works on the southbound carriageway by the end of June this year, subject to weather conditions as laying waterproofing material and new surfacing requires dry conditions. We will then divert traffic onto the southbound carriageway and begin work on the northbound.

The concrete repairs to the southbound carriageway are now around 95% complete, we are currently; completing repairs to the 'special structures' areas, installing kerbs and waterproofing material prior to resurfacing.

Find us on Facebook, search for 'Oldbury Viaduct'

The concrete repairs we've been carrying out have varied from football sized to many square metres. We completed this large full depth repair recently.

New edge 'parapet' units will be installed to this section once the new concrete has cured and gained strength.

## Road closures

The following closures are required to carry out:

- traffic management equipment maintenance
- carriageway inspection and repairs
- litter picking and road sweeping
- installation of new electrical equipment
