

Works on M5 (northbound) between junctions 4 and 3

Highways England (HE) is replacing the barriers between junctions 4 and 3. As part of the works there will be a single lane closure.

The works are due to last for up to four weeks and will involve an overnight lane 2 closure until the end of the scheme and one full closure to remove the traffic management at the end of the works. Date of full closure will be advised nearer the end of works.

The lane closure is required as HE need to remove the existing barrier to the overbridges and with no hard shoulder in place there is not an adequate safety zone to protect the structure.

These works are not part of the Oldbury Viaduct Major renewal scheme.
